Summary

Machine Learning Engineer specializing in **NLP, LLM applications, RAG systems, and AI engineering**. Experienced in building **production-ready ML pipelines, retrieval-augmented generation systems, and scalable AI applications** using **Python, Go, FastAPI, PyTorch, TensorFlow, and modern LLM frameworks**.

Education

Haldia Institute of Technology 2024-Present | Haldia, India
B.Tech in Computer Science and Engineering, Expected Graduation: 2028 , CGPA : 8.67

Experience

Artificial Intelligence Intern – Torque Communications Aug 2026–Present | Remote | Gurugram, India
- Developing an AI-powered organizational communication platform for modeling hierarchical structures, communication relationships, and LLM-based agent interactions.
- Building graph-based communication workflows with relationship-level protocols for information sharing, escalation, and controlled agent-to-agent communication.

Artificial Intelligence Intern – Brah.ma Oct 2025–Mar 2026 | Remote | UP, India
- Developed AI systems leveraging Knowledge Graphs, Context Understanding, and Intelligent Information Retrieval techniques.
- Built and optimized Machine Learning and Deep Learning models for semantic search, contextual reasoning, and information extraction.

Contributor – NumPy Oct 2025 | Remote
- Finalized `linalg`/`fft` deprecations (PR #29909) by removing legacy compatibility shims and updating public exports.
- Collaborated with NumPy maintainers through multiple review iterations to ensure backward compatibility, API consistency, and successful integration into the main branch.

Projects

Chat With Repo – AI-Powered GitHub Repository Assistant *GitHub · Live*
- Built an **AI-powered GitHub repository assistant** using an advanced **RAG pipeline** with query classification, multi-query retrieval, Reciprocal Rank Fusion (RRF), Qdrant vector search, and Cohere reranking for accurate, grounded codebase answers.
- Developed a production-ready platform with **FastAPI**, **AWS Lambda**, **Qdrant Cloud**, **Neon PostgreSQL**, and **JWT authentication**, supporting asynchronous repository indexing, streaming chat, persistent storage, and subscription management across web and Android.
- **Tools:** FastAPI, AWS Lambda, ECS Fargate, S3, LangChain, Qdrant, PostgreSQL, Cohere, Gemini, Groq, GitHub API, Go, Gio, JavaScript, Dodo Payments

RagBucket – Portable RAG Artifact Framework *GitHub · Live*
- An open-source framework that packages vectors, chunks, and retrieval configurations into portable **.rag artifacts**.
- Built a provider-agnostic RAG system supporting multiple embedding and LLM providers with **FAISS**-based retrieval.
- **Tools:** Python, FAISS, LangChain, SentenceTransformers, Pydantic, FastAPI

lazytune – Fast Hyperparameter Optimization for scikit-learn models *GitHub · Live*
- Developed **LazyTune**, a **smart hyperparameter optimization library (available on PyPI)** that achieves **speedup over GridSearchCV with near-identical final performance.**
- Implemented a multi-stage pipeline: quick screening with **cross-validation, performance-based ranking,** early pruning of poor configurations (`prune_ratio`), and full training on top candidates.
- **Tools:** Python, scikit-learn, NumPy, pandas, FastAPI (backend), HTML/CSS/JavaScript (frontend), Vercel

Video-RAG-Search – YouTube Video RAG Platform *GitHub*
- Developed a **Flask-based web application** for **YouTube audio transcription** using **Whisper**, **keyword extraction** with **Groq LLM**, and **semantic embeddings** via **SentenceTransformers** stored in **MariaDB**.
- Implemented **semantic similarity search** for transcript snippets with **ranking**, interactive UI, and caching via **Flask-Caching**.
- Tools: Flask, MariaDB, Whisper, SentenceTransformers, yt-dlp, Groq API

Skills

Languages: Python, Java, Go, C++, SQL, JavaScript | **Libraries & Tools:** NumPy, Pandas, Matplotlib, Seaborn, Scipy, Scikit-learn, XGBoost, TensorFlow, Keras, PyTorch, OpenCV, Transformers, MLflow, Docker, Go-Gin (backend), Go-Gio (App dev.) | **AI/ML & Cloud Platforms:** Hugging Face, LangChain, FastAPI, Qdrant, Streamlit, Gradio, MLflow, zenml, ragas | **Databases:** MySQL, SQLite, Neon Postgres, Cockroach DB | **Soft Skills:** Teamwork, Fast Learner, Adaptability

Certifications

Intro to Machine Learning Kaggle | Jun 2025 | Credential
Skills: Random Forest, Model Validation, Machine Learning

Introduction to Model Context Protocol Anthropic | Mar 2026 | Credential
Skills: LLMs, Agents, Claude, Python
